### **Saturday November 10<sup>th</sup> - Building Motivation and Drive for Obedience:**

Denise will cover drives and how to build them to a level that they can be used throughout our Obedience training. Participants will gain an understanding of their dog's behavior, and learn specific techniques for working with their dog's emotional state. In this seminar, examples will be Obedience focused throughout. Working time will mainly be in groups where participants will each receive one on one feedback on their drive building techniques.

### **Sunday - November 11<sup>th</sup> - Problem Solving For Competitive Obedience:**

This seminar allows extensive working time with each team. There is no group work. Each dog's problem or stage of training is discussed, and options for working through the problem are presented. The team then practices with continuous feedback from Denise.
